

**First, I want three clean buckets.  
I wash these buckets out with  
soap and water until I would be  
happy eating out of them.**

**The first bucket will  
be for "clean" organs  
that I grind into  
sausage.**

**The second bucket is  
for "clean" organs I  
boil into soup stock.**

**The third bucket is  
for "dirty" organs  
that I turn into  
sausage casings.**
